<input type="radio"/>	Test Field D4	258797	<input type="button" value="Edit"/>

Content Sensitive Search (as you type it searches)

Select all objects in the list

Import Data Well  Create >

Export Data select all Selected 3

Delete	Name/ID)	UWI	Edit
<input checked="" type="radio"/>	Test Field A1	123445	<input type="button" value="Edit"/>
<input checked="" type="radio"/>	Test Field B2	456748	<input type="button" value="Edit"/>
<input checked="" type="radio"/>	Test Field C3	1010455	<input type="button" value="Edit"/>
<input checked="" type="radio"/>	Test Field D4	258797	<input type="button" value="Edit"/>

Delete

A count of items selected. (Only appears when items are selected.)

Manually select an object. Any object selected:

- Icon changes
- Row highlights

Import Data Well  Create >

Export Data select all Selected 3

Delete	Name/ID)	UWI	Edit
<input checked="" type="radio"/>	Test Field A1	123445	<input type="button" value="Edit"/>
<input type="radio"/>	Test Field B2	456748	<input type="button" value="Edit"/>
<input checked="" type="radio"/>	Test Field C3	1010455	<input type="button" value="Edit"/>
<input checked="" type="radio"/>	Test Field D4	258797	<input type="button" value="Edit"/>

Confirm Delete

Confirm Delete of Selected Objects.

Cancel Yes

Delete button only shows when items are selected to be deleted

Confirmation window

Import Data Well  Create >

Export Data select all

Delete	Name/ID)	UWI	Edit
<input type="radio"/>	Test Field B2	456748	<input type="button" value="Edit"/>

Undo Change?

Items removed from list. And a undo last change. (Google Ops proof) Shows for a limited amount of time then disappears
